

23 March 2020

India Plant Closures

Coronavirus COVID-19

Dear Valued Customer,

We want to provide you with an update on our operations at our India manufacturing plants. On 23 March 2020, the local Government of Gandhinagar, India issued an order that has resulted in the temporary closure of the Molex India Gandhinagar manufacturing plant. This government mandate, which applies to many businesses, was made in response to the COVID-19 outbreak and currently extends until 25 March.

Also, on 23 March 2020, the Government of Karnataka, India issued a revised order mandating that industries in Bangalore close. Accordingly, Molex Bangalore manufacturing plants will cease operations until 31 March.

Molex is complying with all government requirements. Our Global Business Continuity team continues to meet daily with our senior leadership to support the return to full production at our manufacturing plants in India as soon as we are allowed to do so. However, we expect the plant closure to affect Molex's ability to deliver product on time. We will keep you updated as the situation unfolds.

We appreciate your patience and support, as we work together to deal with this rapidly evolving situation. If you have additional inquiries relative to your orders, please contact your Customer Service Representative or Sales. General inquiries about COVID-19 may be directed to bcp@molex.com.

Sincerely,

Liam Buckley

Senior Director, Global Customer Service
