To Our Industry Partner:

On March 19, 2020, California Governor Newsom issued California Executive Order N-33-20 regarding the State of Emergency as a result of COVID-19, also referred to as the Stay at Home Order.

Per Section 1) of the Order, Lindsey Manufacturing Company is part of the federal critical infrastructure sector of CRITICAL MANUFACTURING, in support of the ENERGY SECTOR, as defined per the DHS Cybersecurity & Infrastructure Security Agency (CISA), and as so identified, our employees are exempt from the stay home order for the purpose of reporting to work in order to maintain continuity of operations.

Lindsey's plant is still in operation and operating at normal production levels. We have implemented part of our contingency plan by re-configuring various manufacturing operations to ensure safe social distance between employees. Any plant employees that wish to stay at home are being accommodated. In addition, most office and engineering staff are now working from home or coming into the office on a rotating basis.

Lindsey is in regular contact with our supply chain and shipping partners to ensure we have advance notice of any issues, allowing us to take appropriate action.

Lindsey will continue normal operations as staffing levels allow. Lindsey has plans in place to maintain operations under currently foreseen contingencies. However, based on the unpredictability of the disease and of government actions, Lindsey cannot guarantee operations under any and all circumstances.

Sincerely,

Jack McCall
Executive Vice President
