Important Announcement: New Travel and Visitor Guidelines

We want to reassure you that Waldman Lighting is taking all the necessary measures in response to the COVID-19 outbreak, in line with guidelines from the CDC, World Health Organization and local government and health authorities. This includes:

- Restricting employee travel.
- Requiring self-quarantine for employees returning from, or in close contact with people returning from affected areas.
- Evaluating scheduled visits to determine business criticality.
- Implementing intensified cleaning and sanitation standards, including reinforced advice to employees on good personal hygiene and handwashing procedures.
- Establishing processes for managing any individuals feeling unwell onsite.
- Actively identifying possible risk scenarios and developing mitigation plans.

Waldmann Lighting is monitoring the COVID-19 outbreak closely and the above measures are continually reviewed and will be adapted to the ever-evolving situation. Nothing is more important to us than the quality and safety of our products and the health and well-being of our employees and partners.
