

# Legrand Supplies 1,350 Temporary Power Pedestals for COVID-19 Patients and Healthcare Workers

As makeshift hospitals rise across the country to meet coronavirus needs, contractors are scrambling to install the proper power sources to run life-saving equipment for an ever-growing number of patients. Unlike home and office applications, electronic devices used in healthcare facilities must meet strict grounding requirements to prevent injury to patients and staff members.

In Hauppauge, New York, contractors were looking for an electrical solution that could be installed quickly and easily—while keeping end users safe and providing reliable, uninterrupted power. Legrand stepped up to the task by creating 1,350 made-to-order Temporary Power Pedestals specifically for healthcare sites during the current COVID-19 pandemic.

Legrand recognizes the importance of manufacturers and suppliers during this time. Any and all essential service orders will be escalated to the front of the line.

## How to Order

Contact your local WESCO branch at:  
<https://branchlocator.wesco.com>

Every part number listed below is standard product as of 4/6/2020.

- E64907 (power pedestal)
- E64908 (power pedestal)
- 304P0870 (30 series)
- 304P0869 (30 series)
- ULBH6-15 (plug-in outlet centers)
- ULBH6-6 (plug-in outlet centers)
- ULM6-15 (plug-in outlet centers)
- ULM620-15 (plug-in outlet centers)
- E64907 is for normal power with light almond devices and two twistlock devices.
- E64908 is for emergency power with red hospital grade receptacles and two twistlock devices.
- Use part numbers 304P0870 and 304P0869 for 30 series Hospital Grade options.

## Features & Benefits:

- Great for use in temporary structures
- Hospital grade receptacles
- Easy to hardwire into the unit
- Freestanding unit – no tripping hazard
- Hospital grade devices
- Switch option available if needed
- Hospital grade receptacles
- Divided for standard and emergency power

304P0869 is a 30 series pole with hospital grade receptacles divided for standard and emergency power. Also includes a single decorator switch to control a light switch.

304P0870 is a 30 series pole with hospital grade receptacles divided for standard and emergency power.

For plug-in outlet centers, we suggest the following units. We will be stocking these in both our east and west coast facilities. There are two units that are for non-patient care areas and two units for patient care areas, see part numbers below:

- ULBH6-15 (6-outlet, 15' cord, 15A)
- ULBH6-6 (6-outlet, 6' cord, 15A)
- ULM6-15 (patient care areas, 6-outlet, 15' cord, 15A)
- ULM620-15 (patient care areas, 6-outlet, 15' cord, 20A)
